SKILLS

- Problem Solving
- Backend designing
- Api writing
- Frontend development
- Adaptability to Change

PROGRAMMING LANGUAGES

- Python
- Java
- HTML - CSS
- Swift
- JavaScript - React

LANGUAGES

- English
- Tamil
- Hindi - spoken
- Kannada - spoken

PROFILE

An aspiring software developer with experience across multiple domains of software engineering, including backend, frontend, and middle-tier development. Among these areas, backend development stands out as a preferred specialization due to its emphasis on logical problem-solving and efficient data management. Continuously seeking new opportunities for growth, this professional is currently steering their career toward data science and artificial intelligence.

PROJECT EXPERIENCE - INTERN

Arjava Tech India Pvt Ltd 2024 - MAY - 2024- JULY
IOS app developer

- An iOS application was developed with a focus on enabling elderly users to connect with their loved ones effortlessly
- A gesture detection system was implemented to allow users to perform desired actions intuitively
- The backend was designed with a strong emphasis on efficiency and reliability, utilizing Firebase for storing voice recordings and securely delivering them to the intended recipients

Future Bits 2024 - August
Back-end developer

- A backend system was designed and developed for a web application using AWS DynamoDB as the primary database solution. The project required adaptation to new technologies, including writing APIs with the Rust-based Axum framework. Responsibilities included modeling and managing a real-time database architecture, as well as implementing and testing various backend functionalities to ensure performance, scalability, and reliability.

EDUCATION

Bachelor of computer application - pursuing 2023- 2026
Tagore collage of arts and science
Chrompet Chennai - 600044
Madras University

Bsc Data Science (online) - pursuing 2025
IIT Madras
