Summary

Aspiring Software Developer and **Data Science** student with expertise in **Full-Stack** (React, Firebase, FastAPI) and **Mobile Development** (SwiftUI). Proven ability to deliver production-grade applications across Full-Stack (React, Firebase, FastAPI) and Mobile (SwiftUI) platforms. Completed over **230** competitive programming challenges across core **Data Structures and Algorithms**. Seeking software development roles focused on Python, AWS, and full-stack systems, with hands-on experience delivering production-ready applications.

Technical Skills

- **Languages:** Python, Java, C++, Swift, SQL
- **Frontend:** React, SwiftUI, Tailwind CSS, HTML/CSS
- **Backend & Cloud:** RESTful APIs, Fast API (Python), AWS (Lambda, API Gateway, S3, DynamoDB), Firebase (Firestore, Auth, Storage, Functions)
- **Data Structures:** Binary Trees, AVL Trees, Graph Traversal, Linked Lists, Stack/Queue
- **Databases:** MySQL, NoSQL, Firestore, DynamoDB, SupaBase - PostgreSQL, SupaBase - Auth
- **Tools & Concepts:** Git, Code Optimization, Postman, Prompting

Professional Development & Experience

Arjava Tech India Pvt Ltd, Chennai,
iOS App Developer Intern

May 2024 - July 2024
[Video Demo](#)

- Designed and developed an MVP iOS voice-based communication app, improving accessibility by enabling hands-free interaction for elderly users.
- Developed a lock-screen voice interaction using the AppIntent Framework and SwiftUI, enabling faster emergency communication with one-tap access.
- Designed a scalable multi-user profile system with Firestore and Firebase, providing secure authentication and reliable data storage.

Projects

SaaS Bay (Full-Stack Web Application)

August 2024 - Present | [Live Demo](#)

- Designed and developed a full-stack marketplace using React and Tailwind CSS, building responsive and user-friendly interface components while improving overall page performance.

Foundational & App Development

- **Agro Value Web App (Hackathon):** Developed the frontend for the **AI Crop Price Predictor**, which secured 4th place in the IIT Madras Hackathon, focusing on user data visualization and display.
- **DSA Implementations:** Implemented **6+ core data structures and algorithms** (AVL Trees, Graph Traversals, Linked Lists) in C++
- **Portfolio & Interactive Apps:** Created a professional portfolio using React and built interactive applications like a React Quiz App, SwiftUI Calculator, and Python Hangman to demonstrate versatile cross-platform development.

Education

TAGORE College of Arts and Science, Chennai,
Bachelor of Computer Applications (BCA)

March 2023 – April 2026
CGPA: 8.0

Indian Institute of Technology Madras (IITM), Chennai
Online B.Sc. in Data Science,

February 2025 - Present
CGPA: 8.33

Achievements

- **First Place Winner** in the **Mind Mash** tech competition (Tectonic Program) at **Madras Christian College**, demonstrating the ability to design, implement, and deliver a working solution within strict time constraints. ([Verify](#))
- Solved **230+ LeetCode problems across Arrays, String, and SQL**, maintaining a **50-day consecutive coding streak** and completing **50+ SQL challenges**. ([Profile Link](#))
